

****GREAT WAY TO LEARN RALLY****

The [100AW Performance Rally Group](#) announces, **Rally Time Control Mastery**, a special online (Zoom) course for those involved in rally.

Ever wondered: “Why do the cars sit outside of a control instead of driving in when they get there?”, “What is a dust minute and how is it handled?”, “What happens if the competitor drives too fast on a transit?”. These are the kinds of questions that will be answered and many more! If you’ve ever worked a start or finish control, or want to, this will be great information. This course will also be directed toward new co-drivers, with a unique perspective for both the competitor and time control workers.

Makisa Upton will be our primary presenter. Makisa is an experienced co-driver, as well as rally organizer. Makisa has held roles at various 100AW PRG events such as Clerk of Course, Chief of Controls, and various other positions along a course.

Rob Bohn will also be on the call and will offer additional insight and commentary. Rob is the Clerk of Course for Rally Colorado, has been a Asst Clerk of Course for Rally in the 100 Acre Wood, as well as an event steward for our events and many others.

Randy Stroede will be the moderator, he is the Chairman of the Show-Me Rally and Volunteer Coordinator for Rally in the 100 Acre Wood.

The course will be held via **Zoom** on the evening of **Tuesday, March 3rd** at 6pm Mountain Time/5pm Pacific Time.

Participants MUST pre-register [here](#).
